

Transformation to SAP DM for the Mill Industry

Become a digital manufacturing leader with a proven ME solution refined by industry experts

delaware has been a powerful expert in the mill industry for more than 20 years. We have a proven track record in manufacturing execution. We empower you to become a Digital Mill Factory by using SAP Digital Manufacturing efficiently and future-proof from top floor to shop floor and back.

What is DM4Mill by delaware?

DM4Mill is a MES industry solution which covers your manufacturing requirements including mill industry specific requirements and processes.

It seamlessly integrates production managers with machine operators and stakeholders for intra logistics. Quality control along with End2End Traceability goes hand in hand with the solution. You are guided through the production in an interactive way, handling industry-specific process requirements. Machine integration frees your experts from repetitive work and increases data accuracy. Manufacturing insights enable transparency on processes at work center level, along the production process and even across production locations.

Next generation DM for Mill Products - Highlights

Order Combination

Support for **combined** production orders(MILL OC)

Advanced Integration

Use of the SAP BTP platform for seamless integration with SAP ECC or S/4HANA

Traceability

Complete traceability of all incoming and outgoing components per process based on batches and handling units

MES Best Practices & Usability

Pre-configured manufacturing best practices with intuitive user interface (fewer clicks, process automation)

Nonconformity Handling

Localization & inheritance of material and production defects per handling unit from raw material to finished goods

Minimization of customer-specific developments

Prefabricated solutions based on more than 20 years of experience

Waste and recycling processes

Automatic recognition and assignment of material and production waste to the respective recycling process

Machine Integration

Greatly reduced effort when connecting to machines and providing pre-configured use cases

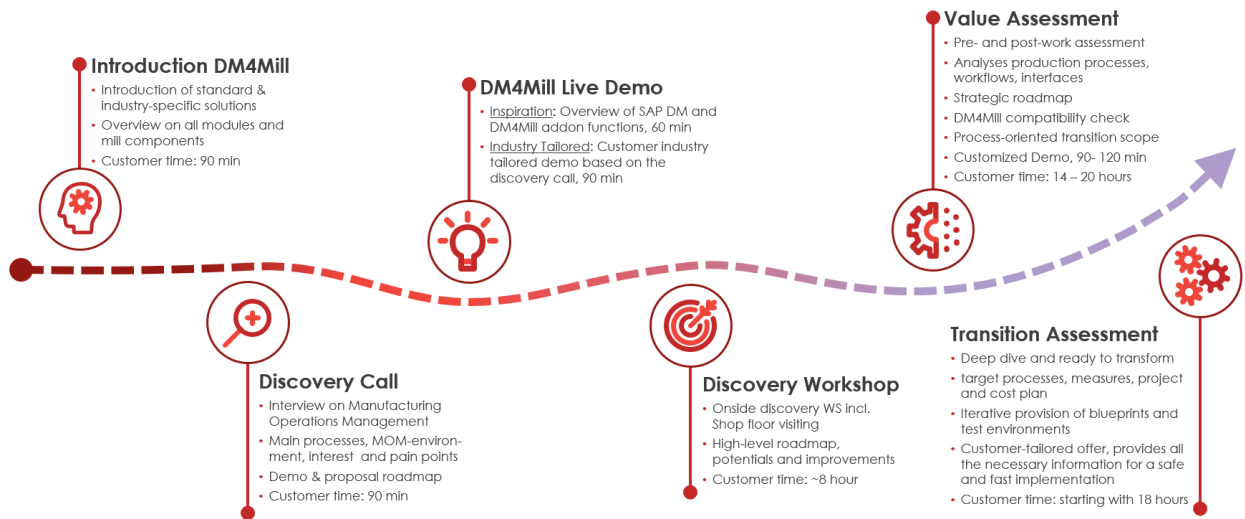

we commit. we deliver.

delaware

Select your journey to Best-in-Class Manufacturing

The right pre-packaged service at the right time

Tangible Benefits with desired Outcomes

- Individual Roadmap for Digital Manufacturing Transformation with cost plan
- Efficient implementation of DM4Mill based on many years of experience and a proven best practice framework
- Future-oriented Digital Manufacturing Solution to differentiate from competitors

Why Customers use DM4Mill

- Industry-specific individualization
- Further development according to new industry standards and technologies
- Differentiation from competitors

“Thanks to the successful cooperation in the project team with focus on the common goal, we are now looking at a reliable result.”

Cornel Müller, Service Delivery and Project Manager, Model Group

Why delaware?

- We are a global company that delivers advanced ICT solutions and services, guiding our customers through their business and digital transformations. We provide them with the tools to achieve their mission-critical priorities.
- Above all, we want to do the right thing. We deliver enterprise and industry expertise that enables our customers' businesses to reach their full potential, while creating a positive impact in a challenging world.
